

LEAKING CRACK REPAIR

STRUCTURAL/FOUNDATION REPAIR - STOPS FOUNDATION LEAKS

The Rhino crack injection kit was specifically developed to fill leaking cracks in poured basement walls, structures, and pools with our injection resin. This kit comes with detailed instructions and everything you need to ensure that the crack is filled with resin which bonds at a strength higher than that of the concrete itself.

CRACK INJECTION

CARBON FIBER

It is recommended that the Concrete Crack Lock™ be used in conjunction with the crack repairs to ensure that additional cracks do not develop.
